

ACCOUNTING INDUSTRY

TOP 10 REASONS TO USE

Secured-Accountant.com offers the accounting industry a unique email solution that allows you to do everything you wish you could do to your regular email, without the need to install, replace, or modify your existing email network. Secured-Accountant.com is a leader in enhancing email communications by adding security, audit trail, real-time tracking, mega-file size attachments, and video messaging through your regular email account. Using Secured-Accountant.com's Private Email Network (PEN), some of the benefits you will enjoy include:

1. **Audit Trail & Real-time Tracking** – Accountants now have the ability to fully track messages and know precisely when messages have been read, replied-to, deleted, printed, or even forwarded (including when and who they have been forwarded to).
2. **Video & Voice Messaging** – Ever hear complaints about not having enough “Face-Time” with your clients? With integrated video & voice messaging, you can now securely record a message to your clients and really tell them how you feel about a specific issue just as though they were sitting right in front of you.
3. **Recall Feature** – With our unique recall feature, users can instantly recall messages sent in error without any time limitations. It also does not matter if the recipient has already viewed or opened the message.
4. **Accountant-Client Confidentiality** – Our system also ensures Accountant-Client confidentiality with its patent-pending audit trail, real-time tracking, and multiple security features.
5. **Secure & Compliant System** – Secured-Accountant.com uses two levels of secure, trusted encryption algorithms (SSL & AES). Our system is also a compliance enabler ensuring full compatibility with most of your client's regulation requirements (GLB, SOX, PIPEDA, HIPAA, NRS 597-970, and 201 CMR 17).
6. **Send Large File Sizes** – Ever have a problem sending large files? Perhaps you can send them, but your recipient cannot receive them? Our system bypasses this limitation by allowing you to send any file type from 250MB, up to a maximum of 20GB/message.
7. **Save on Courier & Faxing costs** – Finally go paperless! With the combination of an Audit Trail & Sending Large File sizes, your organization can now save time & money by substituting a portion of your monthly courier, and faxing costs. You can now send documents quicker, to the correct recipient, and with an audit trail all through the comfort of your regular email account.

8. **Corporate Branding** – No longer do you need to be a large Enterprise to have your logo or brand effectively marketed. With the option of creating your own Private Email Network (PEN), your corporate logo or brand will be openly visible by all of your users raising the professional image of your organization. *(Require a minimum of 5 Active users)*
9. **Zero Downloads** – There are zero downloads required to use the Private Email Network. Accountants, associates, and clients simply go through a 15 second registration process and can begin using the PEN immediately. Keep your existing email address even if it's AOL, Gmail, Hotmail, Yahoo, or your own corporate domain.
10. **Use with your Mobile Device** – Not only can you and your clients use our system with any web browser, and Outlook 2003 & 2007 client, but you can also use it on any of the leading mobile phones and devices. Our system is completely compatible with the iPhone, Blackberry, Windows Mobile, and Symbian devices. There is also no extra charges to use any or all of these clients.

Test drive the solution with a live demonstration. Contact us at 1-800-722-1235 or sales@secured-accountant.com . Also be sure to check out several great links on our website:
